“ *We chose to use this method to let all the family know our thoughts and concerns for you.
You were blessed with a wonderful mother. One attribute that I will always remember is her forcefulness and hard work. We passed her house on the way to our place and to my parents home for many years. I always remember her coming in and out of the house and working in the yard and many other things. We are unable to contact each of you in the family personally. Her being a person who had accepted Christ as her Saviour makes us rejoice in that her life of illness and hardship is now ended, and she will be in the wonderful place of heaven, which God prepared and made possible for all of his children.*
